

Computerized Maintenance Management System

The Powerful, Intuitive, Universal Computerized Maintenance Management System, that slashes your expenses

Fast return on Investment

High-Tech firms such as: **Amdocs**, **Creo**, **ECI**, **Scitex Corp.**, **El-Op Electro Optical Ind.**, **Elscont**, **HP Singapore**, **Philips**, Drugs, Plastics, & Wood products, Textiles, Paints & Petrochemicals, Newspaper industry, Food industry, Municipalities, Police and Defense Forces, Hospitals, **El-Al - Israel International Air Line**, R&D Institutes: **Sde Boker University**, **Ben Gurion University**, **Weizman Institute** - are just a few of the satisfied customers of **POWER 10** in Israel. Their business provides a solid evidence, proving that **POWER 10** can deliver savings of about **6%** to **30%** on every million dollars of your organization's maintenance budget.

Start to work in just two hours

In Today's world, time is of the essence, therefore, learning to use **POWER 10** takes as little as two hours. The simple, standard, intuitive windows are very easy to learn as well to use. It is so easy to use that no previous computer experience is required. You gain all the benefits of a Computerized Maintenance Management System without professional computer training courses. Users report that working with **POWER 10** is an absolute pleasure!!

Adapts to your Requirements

POWER 10 can be used to manage the maintenance of buildings, equipment, sites, systems, vehicles and computer hardware and software inventories as well. **POWER 10** is a CMMS "shell" that can be customized to your business' needs. That's why **POWER 10** serves such a wide variety of users: high tech enterprises, consumer industries, service firms, fleet support, hospitals, hotels, educational institutions, military authorities, office complexes, research

institutes, airports, oil, mining and forestry and many more industries.

Benefits for every level of your organization

POWER 10 enhances productivity, reliability and quality assurance at minimal maintenance costs, by assuring prompt response to service requests, thus reducing breakdowns, downtime and overtime. Supports proactive management, by providing the reports and information you need for operational and strategic decisions regarding maintenance.

Incorporating a sophisticated **End-user Report Designer (ERD)**, **POWER 10** enables end users to redesign existing reports or design new reports in addition to more than 100,000 existing reports.

The user friendly **End-user Screen Designer (ESD)**, enables end users to customize all screen layouts to its special needs, further enhancing the convenience of the system and the satisfaction it delivers.

Introduces a new level of cost Control

POWER 10 improves maintenance personnel management and supervision, management of plant resource, budget planning and control. You reduce maintenance staff, thanks to better scheduling of resources for PM and scheduled maintenance. Supervisor time is also used more efficiently, since the system generates work orders. Any employee can now keep track of records – the supervisor can concentrate on managing the employees.

You enhance productivity as well, as the availability of parts is synchronized with maintenance manpower. And you operate a more efficient storeroom, reducing inventory while ensuring availability of all necessary parts and materials.

Advanced Programming Tool

POWER 10 has been developed under Microsoft Dot Net. It supports MS SQL database for large database and remote working stations. The **POWER 10 Web** support remote users with only a browser installed.

Full Support

You can rely on full support for your **POWER 10** system at every stage, from training, application and start-up through maintenance and software upgrading and enhancements.

Bino Levi International Investments Ltd. 100 Hadas Street, Carmiel 21661 Israel.
